

HELICOPTER FLIGHT TRAINING

YOUR OPPORTUNITY TO TAKE FLIGHT

With more than 40 years of experience, UND Aerospace is the leader in collegiate helicopter flight training.

Receive the best possible education and training offered in the most technologically advanced complex for collegiate aviation in the world. Highly respected by the aviation industry, the John D. Odegard School of Aerospace Sciences offers a liberal arts core curriculum combined with a comprehensive professional aviation education in a variety of specialties. Our faculty's firsthand knowledge in every field of the aerospace industry, coupled with a professional, innovative and caring approach to teaching, sets them apart. Our aggressive placement program includes thousands of successful alumni who serve as a valuable networking resource for graduates.

B.S. in Aeronautics: Commercial Aviation

The Commercial Aviation degree with Helicopter option is specific to rotorcraft operations. This major combines aviation flight courses with a solid liberal arts core. Students will earn a commercial pilot certificate with instrument rating and a certified flight instructor certificate. They will also gain valuable experience in the Robinson R44, which will provide them with an extra edge upon entering the job market. Students may satisfy flight course requirements for any of the majors listed below using rotorcraft.

M.S. in Aviation

The M.S. in Aviation degree provides the necessary educational background for aviation industry professionals to solve problems within the field of

aviation including airlines, corporate aviation, general aviation, and airport management.

Additional Degrees/Majors

- B.B.A. in Airport Management
- B.B.A. in Aviation Management
- B.S. in Aeronautics: Air Traffic Control
- Aviation Technology Management
- Flight Education
- Unmanned Aircraft Systems Operations

 Approved for the GI Bill
